

Dear Occupant:

Radon testing equipment is located _____.

Radon readings begin _____ and end _____.

During this time, please:

1. Do not move, alter or cover the equipment.
2. Keep all windows closed during the testing period. This must be done for the 12 hours preceding the test start as well as the entire testing period.
3. Keep all exterior doors closed except for normal, momentary entry/exit. This must be done for the 12 hours preceding the test start as well as the entire testing period.
4. If applicable, any heating, air conditioning or ventilating equipment has a built-in outdoor air supply that is manually controlled, keep it turned off or keep the inlet closed. Other heating, air conditioning, dryers, range hoods, bathroom fans and attic ventilators can be operated normally.
5. Do not operate fireplaces or wood stoves unless they are a primary heat source.
6. Do not operate whole house fans.
7. Remove window fans or seal shut.
8. Keep closed foundation vents (usually to the crawlspace) unless they are designed or installed in a way that prevents closure.

Please call Home Gnome Inspections with any questions. Thank you for your cooperation!

Sincerely,

Home Gnome Inspections, LLC
